PROFESSIONAL SUMMARY

Business Analyst with 4+ years of experience across Financial Services, Capital Markets, and Asset & Wealth Management. Skilled in requirement gathering, BRD/FRD documentation, impact analysis, and Agile delivery, with a strong track record of reducing defects, accelerating delivery cycles, and managing cross-functional teams. Proficient in SQL, JIRA, Confluence, Tableau, and Power BI. Published industry POVs on CBDC, Digital Asset Custody, and GenAI in Asset Management. View data work on [Tableau Public](#) and project details on [Portfolio](#).

PROFESSIONAL EXPERIENCE

Infosys Limited

Designation: Associate Consultant

Role: IT Business Analyst

Duration: June 2022 – Present

Client: Leading Global Share Registry & Transfer Agency

- Elicited and documented business requirements (BRS, FRD, NFRD) for deferred compensation platform used by asset management clients.
- Managed two cross-functional teams with 6+ members each, ensuring seamless coordination between business BA, clients, and development teams, reducing miscommunication issues by 30%.
- Conducted impact analysis for 30+ change requests, breaking down high-level requirements into 20+ Jira user stories, leading bi-weekly refinement & grooming sessions to clarify scope and minimize rework by 25%.
- Created process flow diagrams, functional specifications, and use cases to support system enhancements and business process improvements.
- Collaborated with Scrum Master in sprint planning, backlog prioritization, and requirement grooming across 15+ Agile sprints.
- Used SQL for data analysis and troubleshooting, resolving 90%+ of requirement-related queries before implementation, reducing defects in UAT by 20%.
- Maintained detailed project documentation in Confluence including BRDs, functional specifications, and process documentation, improving knowledge accessibility and reducing onboarding time by 40%.
- Worked with INVARIS composition platform to manage financial statement templates and client reporting for 500+ investment account holders.
- Delivered 100% of requirements within deadlines, optimizing processes to reduce development cycles by 15%, leading to 20% faster project completion.
- Collaborated with stakeholders to analyze investment account lifecycle, client reporting workflows, and securities processing requirements.

Trident Group

Designation: Graduate Trainee (KY-IL3)

Role: Maintenance Supervisor & Project Coordinator

Duration: December 2021 – June 2022

- Managed maintenance activities for Process House operations and machinery coordination
- Led coordination activities for a ₹200 Cr Yarn Dyeing Project including planning, vendor management, commissioning, and execution support

- Collaborated with cross-functional stakeholders for machinery layout design, process planning, and operational readiness
- Assisted in preparation of CAPEX documentation and investment planning for large-scale process house machinery initiatives
- Coordinated with vendors and internal teams during installation, testing, and commissioning phases
- Created COPs/documentation and maintained project tracking for ongoing operational and engineering activities
